left open to allow the students to experiment and familiarize themselves with the equipment used in collection and reduction of electronic intelligence.

5. The instructor's presentation of the material was excellent. His program was well prepared and thought out, he had all the necessary answers, his technical explanations were easily understandable, and he maintained the students' interest at a high level. This course would be of considerable value to anyone working with Klint. It also serves as a very strong reminder of the urgent requirements that exist in the field for new and better Klint equipment.
